Diversity and Internship Program Manager
Malcolm Pirnie, Inc.
104 Corporate Park Drive
Box 751
White Plains, NY 10602

Dear Monica Lugo,

RE: Malcolm Pirnie 2007 Summer Internship Program

I am writing with reference to the recent posting for a summer intern on your website, on January 31, 2007. I am a Chemical engineering junior with minors in Environmental Engineering and management, currently enrolled at the New Jersey Institute of Technology and I am keenly interested in working with the innovative teams of Malcolm and Pirnie as a Chemical/Environmental engineering consultant.

My training in the university has given experience in chemical processes, Thermodynamics and Organic chemistry. I have designed and tested a miniature spray column generally used in the generation of ammonium. This column was tested and calibrated using Microsoft Excel, pressure gauges and flow gauges. I have also experience in web design which I have used in the creation of websites for organizations on campus. I am also a passionate photographer who values nature which is vital for a position requiring an Environmental Engineering student with in depth knowledge of Nature.

I am a dedicated worker with strong problem solving abilities, leadership and organizational skills and good work ethics. I am dependable, flexible and have no problems working in a team. I look forward to hearing from you and thank you for your time and consideration.
