

Table of Contents

Invited Talk: How Can Data Mining Help Bio-Data Analysis?	1
Jiawei Han University of Illinois at Urbana-Champaign, USA	

Structure Mining

Mining Protein Contact Maps	3
Jingjing Hu, Xiaolan Shen, Yu Shao, Chris Bystroff, Mohammed J. Zaki Rensselaer Polytechnic Institute, USA	

Automated Approaches for Classifying Structures	11
Mukund Deshpande, Michihiro Kuramochi, George Karypis University of Minnesota, USA	

Clustering and Classifying Enzymes in Metabolic Pathways: Some Preliminary Results	19
Sen Zhang, Li Liao, Jean-Francois Tomb, Jason T. L. Wang DuPont Experimental Station, USA and New Jersey Institute of Technology, USA	

Generalization Methods in Bioinformatics	25
Steven Eschrich, Nitesh V. Chawla, Lawrence O. Hall University of South Florida, USA	

Data Mining and Drug Design

Incremental Machine Learning to Reduce Biochemistry Lab Costs in the Search for Drug Discovery	33
George Forman Hewlett-Packard Labs, USA	

Gram-Schmidt Kernels Applied to Structure Activity Analysis for Drug Design	37
Huma Lodhi, Yike Guo Imperial College, University of London, UK	

Closed Set Mining of Biological Data	43
John L. Pfaltz, Christopher M. Taylor University of Virginia, USA	

Gene Expression

E-CAST: A Data Mining Algorithm for Gene Expression Data	49
Abdelghani Bellaachia, David Portnoy, Yidong Chen, Abdel. G. Elkahouloun The George Washington University, USA and National Institute of Health, USA	

Visualized Classification of Multiple Sample Types	55
Li Zhang, Aidong Zhang, Murali Ramanathan State University of New York at Buffalo, USA	

GEA: A Toolkit for Gene Expression Analysis	63
Jessica M. Phan, Raymond Ng, Man Saint Yuen, Steve Jones University of British Columbia, Canada and British Columbia Genome Sequence Centre, Canada
