MARCH 20, 2006

PS 5 (50 points)

CIS 750

SPRING 2006

Due:April 3

Problem 1. (50 points)

This Problem Set's points can be used to supplement Programming Assignment points or used as regular Problem Set points.

You can use these points to fix deficiencies or omissions in `PA1` and/or `PA2`. Note that the assigned grade of either `PA1` or `PA2` will not change. However you can earn extra points that can be added to your total score Programming Assignment score. These points if used this way, however, can not be used as Problem Set points.

For example if in `PA1, PA2` you were 20 points off from a perfect score and you fix all problems and receive 50 points in this problem set, 20 points will be used to up your `PA1,PA2` score and the remaining 30 points will be used as regular problem set points.

Use these points wisely.
