

## **1 Some Study Suggestions**

1. Weekly - Use the textbook (CLRS) as a primary reference and as a secondary reference use your class notes and the Subjects.

You may deviate from this for the following:

- Use the Subjects notes as primary reference only for Graph algorithms and the textbook as a secondary reference.

- Use Subjects 1 and 2 and the textbook as a primary reference concurrently.

2. Practice with some Exercises (section problems) of the textbook or questions of the Subject notes. Some of those questions test your comprehension of the textbook/class material.

(In the textbook, problems appear at the end of a chapter; exercises appear at the end of a section of a chapter. The former are more complex and difficult than the latter.)

3. Practice with the Problem Sets.

4. If you have time, Practice with one or two Problems from the textbook.

5. If there is a Homework due, then and only then try to do it after going through steps 1-4.
