# COURSE SCHEDULE - CHEM 123 - SUMMER 2009

## TEXTBOOK ABBREVIATIONS

- **DW** - Davis & Witten, *Study Guide/Workbook for Chemistry Principles & Practice*, 2nd Ed. (Optional, highly recommended)
- **JD** - John DeKorte, *Student Solution Manual* (Optional, highly recommended)
- **M** - Molecular Structure Models, Type C (for Organic Chemistry), made by MARUZEN

<table>
<thead>
<tr>
<th>TOPIC #</th>
<th>LECTURE and RECITATION TOPICS</th>
<th>CHAPTER HW PROBLEMS</th>
<th>AUDIO-TAPE LESSON</th>

<tbody>
<tr>
<td>TOPIC 1</td>
<td>RGM Chapter 16; Reactions Between Acids &amp; Bases</td>
<td>16.14, 16.16, 16.26, 16.30, 16.44, 16.54, 16.60, 16.64, 16.80, 16.84, 16.90, 16.92</td>
<td>SSM Lesson #21 Buffer Solutions</td>
</tr>
<tr>
<td>TOPIC 2</td>
<td>RGM Chapter 16 - continued</td>
<td></td>
<td>Same Lesson as Week #1 You have 2 weeks to complete SSM Lesson 21</td>
</tr>
<tr>
<td>TOPIC 3</td>
<td>RGM Chapter 17; Chemical Thermodynamics</td>
<td>17.22, 17.30, 17.34, 17.38, 17.46, 17.54, 17.62, 17.74, 17.76, 17.82, 17.86, 17.90, 17.98, 17.100</td>
<td>SSM Lesson #7 Thermal Energy Changes in Chemical Reactions</td>
</tr>
<tr>
<td>TOPIC 4</td>
<td>RGM Chapter 17 - continued</td>
<td></td>
<td>SSM Lesson #27 Balancing Oxidation-Reduction Equations</td>
</tr>
<tr>
<td>TOPIC 5</td>
<td>RGM Chapter 18; Electrochemistry</td>
<td>18.14, 18.32, 18.36, 18.54, 18.58, 18.64, 18.66, 18.72, 18.74, 18.78, 18.90, 18.92, 18.96, 18.106</td>
<td>SSM Lesson #28 Voltaic Cells</td>
</tr>
</tbody>
</table>

**COMMON EXAM #1 - COVERS:** RGM Chapters 16 and 17 - Other Details Announced in Class

| TOPIC 6 | RGM Chapter 18 - continued | | SSM Lesson #29 Electrolyic Cells |
| TOPIC 7 | RGM Chapter 19; Metallurgy, Transition Metals, and Coordination Chemistry | Topics and HW Problems are to chosen by the Instructor | SSM Lesson #24 Coordination Compounds: Composition and Structure |
### TOPIC 8

**RGM Chapter 19 - continued**

- 10/21 to 10/27
- Topics and HW Problems are to chosen by the Instructor
- SSM Lesson #6
- Mole Fraction, Molality and Molarity

<table>
<thead>
<tr>
<th>TOPIC 9</th>

### COMMON EXAM. #2 - COVERS: RGM Chapters 18 and 19 - Other Details Announced in Class

### TOPIC 10

- RGM Chapter 21:
  - Nuclear Chemistry
- SSM Lesson #30
- Nuclear Reactions & Radioactivity

### TOPIC 11

- RGM Chapter 21 - continued
- SSM Lesson #31
- Organic Chemistry: Structures & Formulas

### TOPIC 12

- Start: RGM Chapter 22:
  - Organic Chemistry and Biochemistry
- Topics and HW Problems are 22.26, 22.28, 22.36, 22.38, 22.48, 22.54, 22.56, 22.58, 22.66, 22.70, 22.76, 22.78, 22.86, 22.88
- SSM Lesson #32
- Organic Chemistry: Simple Nomenclature

### COMMON EXAM. #3 - COVERS: RGM Chapters 20 and 21 - Other Details Announced in Class

### TOPIC 13

- RGM Chapter 22 - continued
- No Scheduled Assignment

### TOPIC 14

- Review "Bit’s ‘n Pieces"
- Unfinished Work
- No Scheduled Assignment

**NOTE WELL:** No Student may be enrolled in CHEM 123 unless he or she has either received credit for or has passed CHEM 122.
IMPORTANT INFORMATION - PLEASE READ CAREFULLY

CLASS SCHEDULE  To be announced in class.

LECTURES, RECITATION  Students are expected to read the specified textbook material before coming to class. See below for attendance policy. Instructors may spend more or less time on the topics listed; they may be one or two topics ahead or behind. During Week #1, your instructor will explain the structure of the course. New material is introduced and discussed in lecture. During recitation: (a) the subject matter is repeated and reinforced, (b) questions are answered, (c) homework problems are discussed and solved, (d) quizzes may be given, and (e) new material may be introduced, taught, and discussed.

ATTENDANCE POLICY  Attendance is required at all meetings of this course. Three unexcused absences are tolerated - these include undocumented illness and absences due to personal difficulties. For an excused absence, you must submit documentation to your instructor and obtain his or her approval. Attendance is worth 70 points; 10 points are lost for each unexcused absence beyond three (see end of next page for course grading).

HOMEWORK  Your recitation instructor may assign homework problems different from those listed in this course schedule. All homework assignments must be worked out and submitted according to the specific directions and requirements of your recitation instructor. Late homeworks usually receive a grade of zero. Solutions to the listed homework problems will be posted on the CHEM 123 bulletin board. Please bring to the attention of Dr. Bob Conley (Room 352T; Ext 3277) any mistakes found in these posted solutions.

AUDIO-TAPE LESSONS  All students enrolled in CHEM 123 are required to come to the CHEMISTRY LEARNING CENTER (CLC), Room 110T, and work out each scheduled audio-tape lesson during the week specified. Only half credit will be given if the scheduled lesson is completed one week late; thereafter, no credit will be given. The hours that the CLC is scheduled to be open are posted on the door. If the CLC is not open when it is supposed to be, contact either Dr. Bob Conley (352T) or the department administrative assistant (Gayle Katz) in the Chemistry Office (Room 384T). Dr. Bob or the department administrative assistant will then decide if you need more time to complete that weeks lesson. The CLC monitors will examine your workbook and give any further instructions. When you are finished with the lesson, show your completed assignment in the workbook to the CLC monitor. You will then be credited for the lesson.

Your CHEM 123 instructor may substitute other activities to replace the audio-tape lessons.

WHERE TO GO FOR HELP  Tutoring is available on both a walk-in and appointment basis at the University Learning Center located in Room 200 in Kupfrian Hall, or more information call (973) 596-2992 between 8:30 am to 7:30 pm (Mon-Thu) Fridays 8:30 to 4:00 pm. Tutoring opportunities are usually announced in the Advertisement section of the University newspaper (the VECTOR). Do not wait until it is too late to seek help. If you continue to have academic difficulty with CHEM 123, you are encouraged to make an appointment to talk with your instructor. Instructors usually announce their office hours during the first week of the semester and these office hours are also posted on their office door. Students are also reminded that the office of the Dean of Freshman Studies, 306 Campbell Hall (x2981), may be of some assistance.
COMMON EXAMINATIONS  Three common examinations will be administrated throughout the semester. No books, notes, tables, or scrap paper will be allowed. Calculators but not hand held computers are permitted. Calculators with battery operation only are permitted. Students must bring two #2 pencils to all exams, and four #2 pencils to the Final Exam. Students must know their social security numbers for every examination.

Information describing the format of the common exams will be given by your Lecture Instructor. The Final Exam will be the American Chemical Society composite end-of-year examination for General Chemistry. The material tested is from Chem 121, Chem 122, and Chem 123. This exam is 110 minutes long and will consist of machine graded multiple choice questions and problems only.

One make-up examination will be permitted if there is an acceptable and substantial reason, but a $5.00 fee is required - see section on SPECIAL EXAM FEE in your catalog. A grade of zero will be given for a second missed examination independent of reason. Additional details concerning exams will be given by your Lecture Instructor.

Students are reminded that violations of the NJIT student Honor Code are serious and that the Chemistry Division will make an extraordinary effort to prevent CHEATING on all examinations and will vigorously prosecute cases of cheating, if any, in accordance with NJIT policy and procedures. Students are hereby notified that computer crosschecking and statistical analytical methods are used, in addition to the more traditional methods, to detect and deter cheating.

COURSE GRADING  Common Exams #1, #2, and 3 total 300 points maximum; Final Exam is 250 points maximum. Recitation scores (homework and quizzes) will be statistically adjusted to an average of 85 ± 20 with a maximum of 125 points; Learning Center (audio-tape lessons) scores total to 80 points maximum; Class Attendance maximum is 70 points. The total maximum score is 825 points. A minimum passing score such as 488 points will be established. The Chemistry Division reserves the right to change this minimum passing score at the close of the semester. Because of the weakness in the statistical significance of just a few points out of 825, borderline cases will be considered subjectively by all faculty and staff members involved in CHEM 123. Please be advised that conduct, attitude, and a student's apparent effort will be among factors employed in judging borderline cases.
