

3.68. page 200 (a) This is a stratified random sample. (b) Label from 01 through 25; beginning at line 122, we choose:

13 (760), 15 (818), 05 (415), 09 (408), 08 (650),
07 (510), 10 (831), 25 (619), 23 (909), and 18 (323).

Note: The area codes are in north-south order if we read across the rows; that is how they were labeled for this solution. Students might label down rather than across; the sample should include the same set of labels but a different list of area codes.
