

# 4th Molecular Simulations Workshop

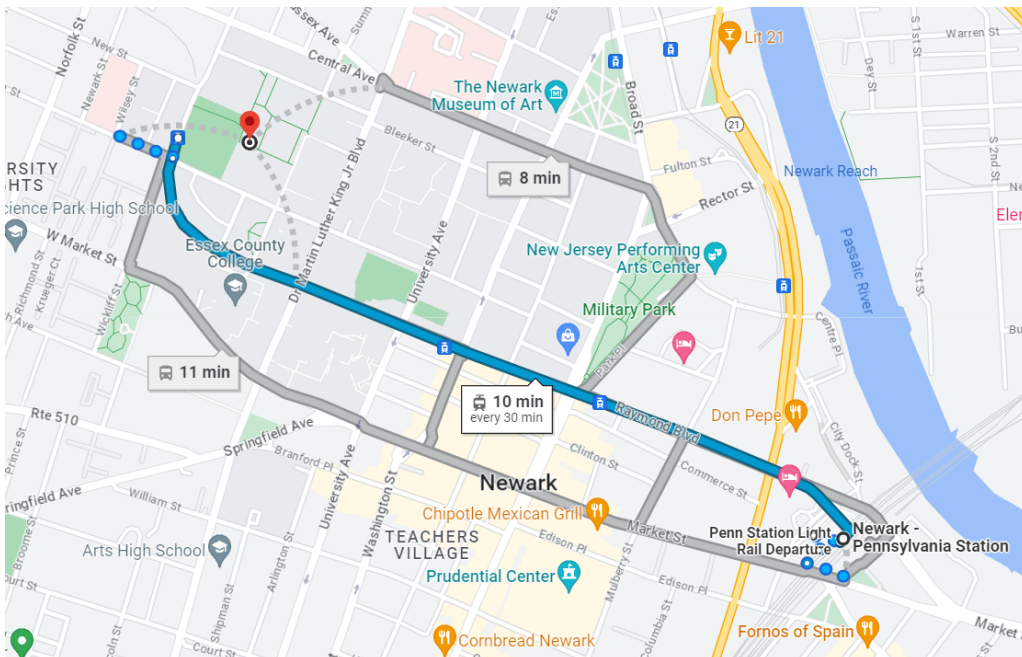

## How to find us

The workshop location is Agile Lab on the first floor of NJIT Central King Building (CKB). The CKB is located near the intersection of MLK Jr. Boulevard and Warren Street, next to Fenster Hall. When you enter the NJIT campus from Warren Street, the Central King Building will be on your right-hand side. It is a distinctive building with a modern design and multiple floors.

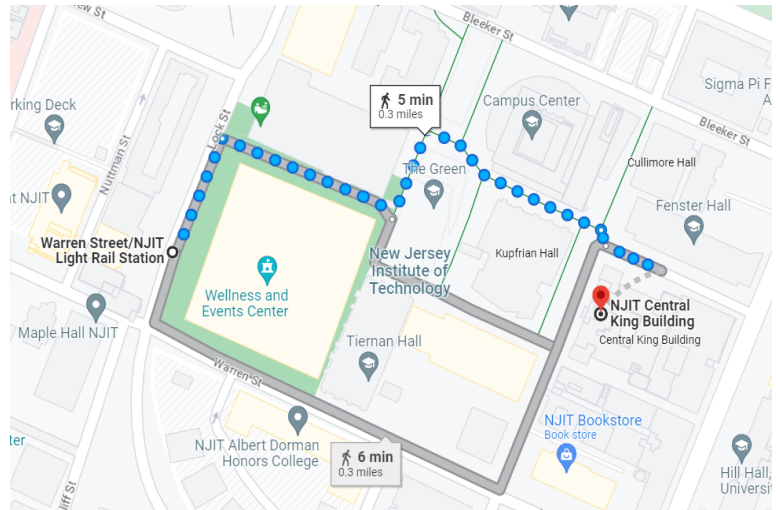

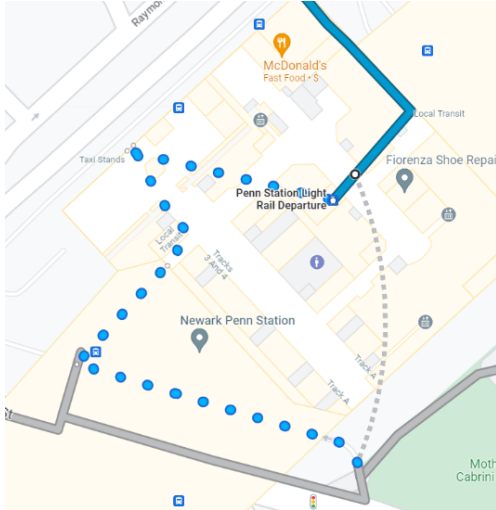

If you are planning to travel to the NJIT campus from Newark Penn Station, there are three best options to consider:

### a) Taking NLR (Newark Light Rail) (approx. 10 minutes)

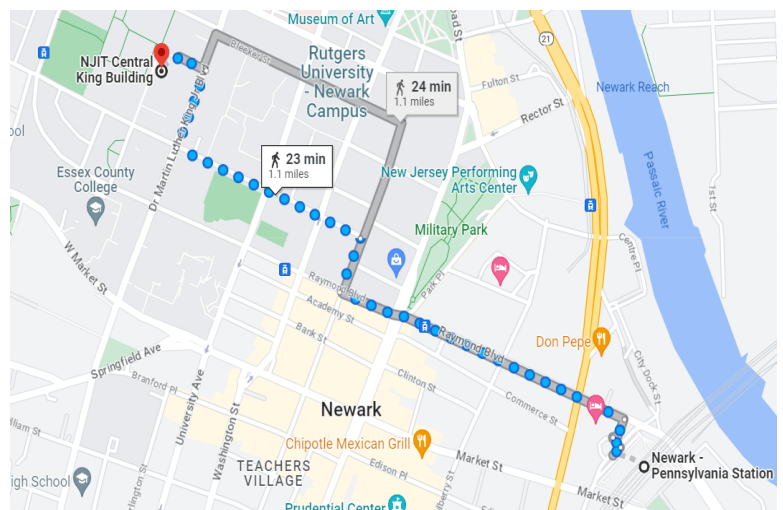

To travel to the NJIT campus by NLR, you need to exit the Penn Station by heading towards the main entrance or concourse area. Then, you are required to go to the Light Rail station, and remain on the Newark Light Rail train until you reach the Warren Street Station. This station is the closest one to the NJIT campus.

b) By walking (approx. 23 minutes)

To reach the workshop location from Penn Station by walking, you need to exit the building and turn right to start walking south on Raymond Boulevard for approximately 0.5 miles (0.8 kilometers). When you reach the intersection with MLK Jr. Boulevard, turn right, and continue walking on MLK Jr. Boulevard for approximately 0.4 miles (0.6 kilometers). You will pass by the Rutgers-Newark campus on your left. As you approach the intersection with Warren Street, you will see the NJIT campus on your right.

Also, NJIT can provide free parking. Please contact organizers for more details. The NJIT Parking Deck is located at 154 Summit St. When they arrive, press the button and provide security your name and the name of the workshop.
