Description of Course
It provides a solid theoretical foundation for understanding operating systems. This edition has been thoroughly updated to include contemporary examples of how operating systems function.
It bridges the gap between concepts and actual implementations and it combines instruction on concepts with real-world applications so that students can understand the practical usage of the content.

Mode of Instructional Delivery
Lectures – converged – course meeting partially face-to-face and partially synchronous online via WebEx. In order to avoid direct contact, attendance will be conducted via WebEx.
All exams will be delivered online. The platform ProctorU will be used to ensure the integrity of the online exams. Students are required to have a working webcam and microphone to take an exam.
All homework assignments must be submitted via email by the due date. All submitted work must include name and student ID.
