Include ALL items below. The number of slides is a recommendation only.

1. Title Slide: name of project and team members (1 slide)
2. Summary description of project (1 slide)
3. Project Background (2 slides max)
4. Customer Needs (1slide)
5. Summary of Requirements (not the detailed documents but a bulleted list of the major requirements). Show the traceability from Customer Needs to Test Results. Be sure to include all requirements being tested. (1 slide)
6. Summary of The Final Design: include picture(s), drawings, very short video, very quick demo welcome etc. (1-3 slides)
7. Summary of Results of Test Plan Execution – include number of pass/fail, etc. A table is a nice idea. (1-3 slide)
8. Detailed Discussion of Test Results and how your product meets the customer needs/requirements. Clearly tie each test to the requirement(s) it validates. As many slides as needed (but < 10 slides) **(THIS IS THE MEAT OF THE PRESENTATION)**
9. Discussion of how well the schedule was met (1-2 slides)
10. Lessons learned and what you could have done differently knowing what you now know (2 slides) **(THIS IS THE MEAT OF THE PRESENTATION)**
11. Comparison of the final expenditures vs the budget (1 – 2 slides)
12. Next Steps – what the next team of engineers should consider to take your prototype to the next level (1 slide)
13. Team Roles and Responsibilities: specifics for each team member (1 slide)
14. References (1 slide)
