5:00	2	Roman		

Email final presentations to Dr. Schesser by 9:00PM the day before presentation

PLEASE compress picture sizes so that the resulting PPT is not huge! Presentations SHOULD BE less than 5 MB.

Include ALL following of 14 items. The number of slides is a recommendation only.

1. Title Slide: name of project and team members (1 slide)
2. Summary description of project (1 slide)
3. Project Background (2 slides max)
4. Show the traceability from Customer Needs to Test Results. Be sure to include all requirements being tested. (1 slide)
5. Summary of The Final Design: include picture(s), drawings, very short video, very quick demo welcome etc. (1-3 slides)
6. Summary of Results of Test Plan Execution – include number of pass/fail, etc. A table is a nice idea. (1-3 slide)
7. Detailed Discussion of Test Results and how your product meets the customer needs/requirements. Clearly tie each test to the requirement(s) it validates. As many slides as needed (but < 10 slides) **(THIS IS THE MEAT OF THE PRESENTATION)**
8. Discussion of how well the schedule was met (1-2 slides)
9. Lessons learned and what you could have done differently knowing what you now know (2 slides) **(THIS IS THE MEAT OF THE PRESENTATION)**
10. Comparison of the final expenditures vs the budget (1 – 2 slides)
11. Next Steps – what the next team of engineers should consider to take your prototype to the next level (1 slide)
12. Team Roles and Responsibilities: specifics for each team member (1 slide)
13. References (1 slide)
