Safety Guidelines for Undergraduate Laboratories

1. Think Safety.  
_Haste causes many accidents, work deliberately and carefully; No Horseplay_

2. All laboratory students must be supervised.  
_Never work alone._

3. Know the hazards of any materials or machinery you are working with.  
_Your instructor will review specific safety issues on individual experiments before you perform any tests._

4. All Students must wear appropriate safety equipment.

5. All students must wear appropriate laboratory attire.

6. No food or beverage in laboratory.

7. Know emergency procedures.  
_Make note of fire escape routes, emergency phone locations and telephone numbers._

9. Keep your work area clean.

10. Failure to conform with any of the above rules may result in not being allowed to participate in the laboratory experiment.
