Great Class! Great Professor. really Enjoyed this class.Great class project, very good assignments that helped us finish our project. The project made us use all activities that we learned in class.

I worked very hard in this class as it was a very interesting class that added a new learning skill in me every week that I could use at my work.

Q1-Q2, Q4-Q11 Scale: 4 - Excellent 3 - Good 2 - Satisfactory 1 - Fair 0 - Poor

Q3 Scale: 4 -Very difficult 3 - Difficult 2 - Average 1 - Easy 0 - Very easy

**What are the best features of this course?** *700 characters maximum*

The best features of this course is the communication that exist from from every group of students with the professor. This is a very important key in this course because it allows you to ask questions and get response back from the professor about our group project. Also, group communication allows other group to understand very well certain things that students will no be able to figure out without a required explanation from your professor. Therefore; as students we can actually understand very well what we need to do to continue working with our project up to its completions.

**What aspects of the course would you want to see improved?** *700 characters maximum*

The only improvement that I can recommend is when the professor is not available to take care of students issues because she is sick or she has some problem with weather(it is snowing where the professor is and there is not power), the university immediately alert the students that the professor will not available during this time. Do not get me wrong on that because I am not saying that our professor never responded us back with e-mails instead she usually responses really fast to e-mails from students.

**Question on this form may not have covered everything you would like to assess about the course and the instructor. If there is anything else you would like to add, please do so here.** *700 characters maximum*

I think that Regina is a perfect professor for this course and I hope that she can stay in NJIT for more year to come. I would like to have her as an instructor for my next course.

This comment isn't for this professor, but for all others that need improvement:

Other professors need to update their personal systems and focus more on a course's material. After all, we are a technology university.

I had to drop Professor Mehta because of his insane requests in submitting assignments. I don't have time for copy and paste, or assignments that lead others to plagiarizing. I'm here to learn. Rather than having a 10-step process in submitting assignments, him and other professors need to be more effective with DL courses.

**What are the best features of this course?** *700 characters maximum*

Project is a good way to learn.

**What aspects of the course would you want to see improved?** *700 characters maximum*

More hands-on assignments like quizzes and research papers on top of the project would be useful.
