Internet2 Day—Friday, April 22

NJIT Internet2 Day will be held at the NJIT Campus Center from 9:00 AM to 3 PM.

What is Internet2?

Internet2 is a bigger, stronger, and faster version of today's Internet. Designed for research, Internet2 allows for multi-point video conferencing, remote instrumentation, large database sharing, and advanced distance collaboration.

Internet2 will enhance teaching, learning, research and help establish timely communication between academic institutions.

What is Internet2 Day at NJIT?

It is a day designed to increase faculty awareness of the capabilities of Internet2 and to showcase some ways it is already being used by educational institutions across the United States.

Explore The Limitless Possibilities of INTERNET2

Morning

- *Guest speaker* Charles Yun, Program Manager for Science and Engineering for Internet2, will discuss the ways advanced networking is being used to enhance research and learning.
- *Guest speaker* Jennifer MacDougall, Applications Coordinator for MAGPI, will demonstrate the NJIT Access Grid, which will allow for multi-site video conferencing.

Afternoon

- **The Internet2 Commons:** A service dedicated to connecting research institutions to one another using multi-site conferencing tools.
- **The Research Channel:** A forum where visitors can get an in-depth look at today's cutting edge technology development.
- **VRML Demo:** Create "virtual worlds" networked via the Internet for advanced interactive simulation.
- **Video Conferencing Basics:** Learn exactly what is needed to video conference with your colleagues.
- **Internet2's K20 Initiative:** Bringing innovators in K-12, community colleges, universities, libraries, and museums onboard Internet2.
- **NJEDge.Net - NJ's higher education network and more!**
