

**A Postdoctoral Research Associate Position Available**

A postdoctoral research associate position starting in Sept. 2017 or earlier is available in the Department of Mathematical Sciences at the New Jersey Institute of Technology, USA. This position is for one year with the possibility of renewal for one additional year. Applicants should have a PhD with research focus on nonlinear waves, geophysical fluid dynamics, and/or scientific computing. The successful applicant is expected to work on an NSF funded research project on nonlinear water wave interactions using both asymptotical and numerical approaches. To apply, send a CV, a research statement, and the names of three references electronically to Prof. Wooyoung Choi (wychoi@njit.edu).
